Ferro Industries

We started our journey in 1996 & since then have emerged as a winner in many aspects. Ferro Industries is managed by a group of engineers & professionals having a vast experience & knowledge in the metal processing industry. A team of technical designers & mechanical engineers make Ferro Industries a one-stop unit to provide our customers a complete roll-forming solution.

There has been a regular improvisation in our machines since the time we started and today we are equipped with sophisticated and modern machinery at our own workshop and our vendors are reliable and prompt.
